

An important message from Freestone.

For anyone taking any online course(s) on the CSRC education platform, please read the message below.

Please be aware, Freestone (online courses) is migrating our platform hosting to Amazon Web Services (AWS). AWS has best-in-class infrastructure services that will optimize our stability and scalability, while ensuring the highest standards of security and data protection.

This platform migration to AWS will take place from Friday, November 18, at 11 pm Eastern through Sunday, November 20, 11 pm Eastern.

During this time, MyFreestone will be unavailable, and **learners will be unable** to access their Freestone portal and classroom. Learners will be redirected to a standard maintenance page during this time.
